

# J10

AIR PURIFIER

Self-development

long life

High precision

low cost

## TECHNICAL PARAMETER

Name	DTF AIR PURIFIER
Model	J10
Air Volume	280m <sup>3</sup> /h
Noise	S45DB
Power	200W
Input	220V 50HZ
Filter Element	Layer 3
Filtering Effect	0.3um
Filtering Efficiency	≥99%
Machine Size/Weight	440mm*240mm*450mm 17kg
Packaging Size/Weight	520mm*360mm*590mm 20kg

- Good circuit board sealing
- Adjustable suction speed
- Strong suction and low noise
- High temperature aluminum alloy pipeline
- Activated carbon and high efficiency filter
- No burning of circuit board and motor

It is specially designed for device exhaust filtration to meet environmental exhaust requirements. Independent external universal design, no need to consider configuration and installation, and can be used immediately upon connection of the hose. There are corresponding supporting solutions for the smoke exhaust requirements of various devices such as powder shaking machines, single color printing machines. etc. By discharging and filtering the oil fumes generated during the drying process, the smoke extraction effect of powder shaking and single color printing machines is improved, the processing quality is improved, and a clean, smoke-free working environment is created.
